\$1,060 Avg. Rent	\$1,223 Avg. Rent	\$1,552 Avg. Rent	\$1,801 Avg. Rent

“Low vacancy rates due to migration and employment growth, coupled with climbing prices for entry-level ownership housing, put strong upward pressure on rents.”

Eric Bond
Principal, Market Analysis (Vancouver)

*CMHC collects data on the primary and secondary rental market annually, in the fall. These data refer to the primary rental market, which only includes rental units in privately-initiated apartment structures containing at least three rental units. The secondary rental market covers rental dwellings that were not originally purpose-built for the rental market, including rental condominiums. The primary vacancy rate and rent level is based on all surveyed structures, while the rent increase is based only on structures common to the survey sample in both the current and previous year.

Key analysis findings:

- Despite record construction of new units, strong demand for rental accommodation kept the vacancy rates below 1% for both primary rental apartments¹ and rental condominium apartments.
- The rapid increase in entry-level home prices and higher migration to the region have contributed to rental demand.
- For the third consecutive year, average rents increased faster (5.9%) than the provincially-allowable increase (3.7% in 2017).
- Prospective tenants face higher rents than long-term tenants, with the average rent for vacant units being 11% higher than the average rent for occupied units in October 2017.

Vacancy rates remain low, divergence across areas emerges

The rental market continues to be very tight in the Vancouver Census Metropolitan Area (CMA), with the vacancy rate for purpose-built apartments remaining below 1% to stand at 0.9% in 2017. In general, vacancy rates moved up slightly in

more expensive areas and either remained flat or fell slightly in more modestly priced areas. Despite increased rental construction, the overall vacancy rate has remained under 1% for three years.

Employment growth and migration are the main contributors to growing rental demand

Employment in the Vancouver CMA continues to grow, with total employment increasing 2.7% in the past 12 months to October 2017. The persistently strong job market has contributed to the unemployment rate falling to 4.3%, one of the lowest among major centres across Canada.² The strength of the local labour market coupled with the relative weakness seen in other provinces, particularly Alberta, has been the main factor in the substantial year-over-year increases in net interprovincial migration to the Vancouver CMA.

According to recently released 2016 Census data, 59% of net new households added to the Vancouver CMA between 2011 and 2016 were renters, compared with 32% in the preceding five-year period (Table 1). The near doubling of this measure

likely results from a higher share of migrant households to the region renting and a slower movement of households from rental into homeownership due to rising prices. In the City of Vancouver, fully three-quarters of net new households between 2011 and 2016 were renter households.

Rising prices of entry-level ownership housing puts pressure on vacancy

As reported in CMHC's 2017 Housing Market Outlook for Vancouver, the resale housing market has been operating at "two speeds" since the middle of 2016. While price growth in the single-detached home segment has slowed in the past year due to many buyers being priced out of the market, apartments and other more affordable units have seen rapid and continuing price growth through 2017.

Table 1. Share of renter households in the Vancouver CMA as a portion of total households and net new households, 2011 and 2016

	Renter Household Share of Total Households (%)		Net New Renter Household Share of Net New Households (%)

¹ The survey is based on privately-initiated rental apartment structures of three or more units.

² Labour Force Survey, Statistics Canada

Figure 1

Sources: CMHC Rental Market Survey, CMHC Secondary Rental Market Survey, REBGV, FVREB. Internal calculations by CMHC.

Note: Carrying cost includes mortgage payment, median condominium (strata) fees and median property taxes.

Current renters looking to purchase their first property, typically an apartment condominium, face two growing barriers: rising carrying costs and rising required down payments. Carrying costs had been relatively flat since 2007 as modest price growth was offset by falling mortgage rates; however, since the second half of 2015, prices have grown quickly with carrying cost increasing despite record low mortgage rates (Figure 1).

With rates now beginning to rise, some renter households will find these carrying costs unaffordable and will be looking to rent long term. Rising entry-level home prices also mean that a larger down payment is required for home purchase. As a result, some renter households may choose to stay in rental housing longer to save for their down payment – further adding to demand.

Sustained low vacancy rates put upward pressure on same-sample rents³

Reflective of the tight rental market, same-sample average rents for primary market rental units increased by 5.9% for all bedroom types within the Vancouver CMA over last year. This represents the fourth consecutive year average rents have increased faster than the provincially-allowable increase⁴, which suggests that landlords are able to increase rents to market levels that are now much higher than those previously paid by long-term tenants.

Rental rates can be materially higher for vacant units

The average rent for vacant units was 11% higher than the average rent for occupied units in the Vancouver CMA, suggesting that market rents currently faced by prospective tenants are seeing strong upward pressure due to the low number of vacancies in the market (Table 2). This also suggests that longer term tenants with lower-than-market rents may be less inclined to move to a different

Source: CMHC Rental Market Survey

Note: Data Reliability indicators (a,b,c) explained in the Methodology

³ This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

⁴ The BC Residential Tenancy Branch imposes tenant-based rent guidelines in BC. For 2017, the allowable rent increase was 3.7%. When a unit turns over to a new tenant, the landlord is free to set a new rent amount at the market level.

Figure 2

Source: CMHC Starts and Completions Survey, CMHC Rental Market Survey.
 Note: Rental Units in structures with 5 or fewer units are excluded due to the majority of those units being accessory suites and laneway homes, which are not included in the primary rental market

suite, as reflected in the lower turnover rate of 13.9%⁵ observed in 2017.

Supply of purpose-built rental units increasing

Following several decades of relatively few new rental units coming to market, the past five years have seen large increases in rental starts, with the inventory of rental units under construction hitting levels not seen since the 1970s (Figure 2). Rising rents, low financing costs, growing interest from institutional investors and municipal incentive programs have stimulated supply of new units in the rental market. While new units tend to command higher rents than existing units, new units allow renters who desire newer-condition suites to move, freeing up additional supply at other price points. Due to the recent completions of units started in the last couple of years, the universe of rental apartment units enumerated in CMHC’s Fall 2017 Rental Market

Survey increased by 629 units in the Vancouver CMA; however, the results were not evenly distributed across municipalities, with the Tri-Cities and Burnaby seeing declines of 221 and 234 units respectively due to recent renovations and demolitions.

Figure 3

Source: CMHC Rental Market Survey, CMHC Secondary Rental Market Survey

Apartment condo vacancy rate increases

Strong rental demand, coupled with limited additions to the stock of rental apartment condos, kept vacancy rates below 1%. The (investor-held) rental apartment condominium vacancy rate increased to 0.6% from 0.3% the previous year. In 2017, an estimated 1,841 units were added to the rental condominium apartment stock, compared to the addition of 1,516 units in 2016. Consistent with the sustained low vacancy rates observed, the average monthly rent for apartment condominiums increased to \$1,758.

The secondary rental market includes condominium apartments, laneway houses, and secondary suites, among other types. With secondary rental market units making up approximately 60 % of all rental units in the Vancouver CMA, this segment of the market represents a more important supply of rental units in Vancouver than it does in the Toronto and Montreal CMAs (Figure 3).

⁵ Turnover is a measure of mobility of tenants and provides a gauge of how often units become available in an area.

RMS ZONE DESCRIPTIONS - VANCOUVER CMA	
Zone 1	West End, Stanley Park is the area between Stanley Park and Denman Street and extends to Coal Harbour to the north and English Bay to the south.
Zone 2	English Bay runs along Sunset Beach and English Bay to the south, connects to Davie Street to the North and Burrard Street to the East.
Zone 3	Downtown is the remainder of the West End not covered in Zone 1 and 2. Does not include the Downtown Eastside.
Zones 1-3	West End/Downtown
Zone 4	South Granville/Oak is west of Mount Pleasant and extends south to 33rd Avenue and west to Granville Street. Also includes the Fairview area and contains a section between Broadway to the north and 16th Avenue to the south, Burrard Street to the west and Granville Street to the east.
Zone 5	Kitsilano/Point Grey is the area west of South Granville/Oak that extends along 16th Avenue to the University Endowment Land.
Zone 6	Westside/Kerrisdale is the area south of Kitsilano/Point Grey and South Granville/Oak, and includes the areas: Kerrisdale, Mackenzie Heights, Dunbar, Shaughnessy and Oakridge.
Zone 7	Marpole is an area in South Vancouver that borders south of 57th Avenue between Cambie Street to the east and MacDonald Street to the west, and extends south down to the Fraser River.
Zone 8	Mount Pleasant/Renfrew Heights is the area that extends from the Mount Pleasant area to the west to Renfrew Heights to the east, and includes the neighbourhoods of Fraser and Knight. The area boundary to the north is Great Northern Way and Broadway, and roughly 33rd Avenue to the South.
Zone 9	East Hastings is the northeast area of Vancouver City, and includes the Downtown Eastside.
Zone 10	Southeast Vancouver includes the areas: Killarney, Fraserview, Collingwood and Champlain Heights.
Zones 1-10	Vancouver City
Zone 11	University Endowment Lands includes both the municipality and University of British Columbia. Note: the Rental Survey does not include student housing.
Zone 12	Central Park/Metrotown is the area between Boundary Road to the west and Royal Oak Avenue to the east, Moscrop Street and Gilpin Street to the north and Marine Drive to the south.
Zone 13	Southeast Burnaby extends to the border of New Westminster and includes the areas: Edmonds, Middlegate, Buckingham Heights, Deer Lake and Burnaby Lake.
Zone 14	North Burnaby is the northern half of Burnaby and includes the areas: Willingdon Heights, Brentwood Park, Capitol Hill, Sperling, Simon Fraser and Lougheed.
Zones 12-14	Burnaby City
Zone 15	New Westminster is the city boundaries.
Zone 16	North Vancouver City is the city boundaries.
Zone 17	North Vancouver DM is the district boundaries.
Zone 18	West Vancouver is the district boundaries.
Zone 19	Richmond is the city boundaries.
Zone 20	Delta is the corporation boundaries.
Zone 21	Surrey is the city boundaries.
Zone 22	White Rock is the city boundaries.
Zone 23	Langley City and Langley DM includes both the city and township boundaries.
Zone 24	Tri-Cities consists of Coquitlam, Port Coquitlam and Port Moody.
Zone 25	Pitt Meadows/Maple Ridge is the district boundaries for both municipalities.
Zones 1-25	Vancouver CMA

CONDOMINIUM SUB AREA DESCRIPTIONS - VANCOUVER CMA	
Sub Area 1	North Shore includes RMS Zone 16 (North Vancouver City), Zone 17 (North Vancouver DM), and Zone 18 (West Vancouver).
Sub Area 2	Burrard Peninsula includes RMS Zone 1 (West End, Stanley Park), Zone 2 (English Bay), and Zone 3 (Downtown).
Sub Area 3	Vancouver Westside includes RMS Zone 4 (South Granville/Oak), Zone 5 (Kitsilano/Point Grey), Zone 6 (Westside/Kerrisdale), Zone 7 (Marpole), and Zone 11 (University Endowment Lands).
Sub Area 4	Vancouver Eastside includes RMS Zone 8 (Mount Pleasant/Renfrew Heights), Zone 9 (East Hastings) and Zone 10 (Southeast Vancouver).
Sub Areas 3-4	Vancouver East/Westside includes RMS Zone 4 (South Granville/Oak), Zone 5 (Kitsilano/Point Grey), Zone 6 (Westside/Kerrisdale), Zone 7 (Marpole), Zone 8 (Mount Pleasant/Renfrew Heights), Zone 9 (East Hastings), Zone 10 (Southeast Vancouver), and Zone 11 (University Endowment Lands).
Sub Areas 2-3-4	City of Vancouver
Sub Area 5	Suburban Vancouver includes RMS Zone 12 (Central Park/Metrotown), Zone 13 (Southeast Burnaby), Zone 14 (North Burnaby), Zone 15 (New Westminster), Zone 19 (Richmond), and Zone 24 (Tri-Cities).
Sub Area 6	Fraser Valley includes RMS Zone 20 (Delta), Zone 21 (Surrey), Zone 22 (White Rock), Zone 23 (Langley City and Langley D.M.), and Zone 25 (Pitt Meadows/Maple Ridge).
Sub Areas 1-6	Vancouver CMA

NOTE: Refer to RMS Zone Descriptions page for detailed zone descriptions.

TECHNICAL NOTE:

Difference between Percentage Change of Average Rents (Existing and New Structures) AND Percentage Change of Average Rents from Fixed Sample (Existing Structures Only):

Percentage Change of Average Rents (New and Existing Structures): The increase/decrease obtained from the calculation of percentage change of average rents between two years (example: \$500 in the previous year vs. \$550 in current survey represents an increase of 10 percent) is impacted by changes in the composition of the rental universe (e.g. the inclusion of newly built luxury rental buildings in the survey, rental units renovated/upgraded or changing tenants could put upward pressure on average rents in comparison to the previous year) as well as by the rent level movement (e.g. increase/decrease in the level of rents that landlords charge their tenants).

Percentage Change of Average Rents from Fixed Sample (Existing Structures Only): This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

METHODOLOGY FOR RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey (RMS)** every year in October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10,000 and more. The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months. The survey collects market rent levels, availability (outside Quebec), turnover and vacancy unit data for all sampled structures.

The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of October, and the results reflect market conditions at that time.

CMHC is constantly reviewing the Universe of rental structures in the rental market Universe to ensure that it is as complete as possible. Every year, any newly completed rental structures with at least 3 rental units are added to the Universe. In addition to this, CMHC undertakes comprehensive reviews by comparing the Universe listing to other sources of data to ensure that the list of structures is as complete as possible.

CMHC's Rental Market Survey provides a snapshot of vacancy, availability (outside Quebec), and turnover rates and average rents in both new and existing structures. There also exists a measure for the change in rent that is calculated based on existing structures only. The estimate is based on structures that were common to the survey sample for both the previous and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. The estimate of percent change in rent is available in all Canada and Provincial Highlights publications, and also in the CMA reports. The rent levels in new and existing structures are also published. While the percent change in rents in existing structures published in the reports are statistically significant, changes in rents that one might calculate based on rent levels in new and existing structures may or may not be statistically significant.

METHODOLOGY FOR CONDOMINIUM APARTMENT SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the Condominium Apartment Survey (CAS) in late summer and early fall to estimate the relative strengths in the condo apartment rental market. The CAS collects the number of units being rented out and the vacancy and rent levels of these units in the following CMAs: Calgary, Edmonton, Gatineau, Halifax, Hamilton, Kelowna, Kitchener, London, Montréal, Ottawa, Québec, Regina, Saskatoon, Toronto, Vancouver, Victoria and Winnipeg. The CAS is conducted by telephone interviews and information is obtained from the property management company, condominium (strata) board, or building superintendent. If necessary, this data can be supplemented by site visits if no telephone contact is made.

CMHC publishes the number of units rented, vacancy rates and average rents from the Condominium Apartment Survey. A letter code representing the statistical reliability (i.e., the coefficient of variation (CV)) for each estimate is provided to indicate the data reliability.

RENTAL MARKET SURVEY (RMS) AND CONDOMINIUM APARTMENT SURVEY (CAS) DATA RELIABILITY

CMHC does not publish an estimate (e.g. Vacancy Rates and Average Rents) if the reliability of the estimate is too low or the confidentiality rules are violated. The ability to publish an estimate is generally determined by its statistical reliability, which is measured using the coefficient of variation (CV). CV of an estimate is defined as the ratio of the standard deviation to the estimate and CV is generally expressed a percentage. For example, let the average rent for one bedroom apartments in a given CMA be \bar{x} and its standard deviation be $\sigma_{\bar{x}}$. Then the Coefficient of Variation is given by $CV = \frac{\sigma_{\bar{x}}}{\bar{x}}$.

Reliability Codes for Proportions

CMHC uses CV, sampling fraction and universe size to determine the ability to publish proportions such as vacancy rates, availability rates and turnover rates. The following letter codes are used to indicate the level of reliability of proportions:

- a — Excellent
- b — Very good
- c — Good
- d — Fair (Use with Caution)
- ** — Poor — Suppressed
- ++ — Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).
- No units exist in the universe for this category
- n/a — Not applicable

The following two tables indicate the level of reliability of proportions:

If the proportion is Zero (0) and sampling fraction is less than 100% then the following levels are assigned:

Sampling Fraction (%) range

Structures in Universe	(0,20]*	(20,40]	(40,60]	(60,80]	(80,100)
3 – 10	Poor	Poor	Poor	Poor	Poor
11 – 20	Poor	Fair	Fair	Fair	Good
21 – 40	Poor	Fair	Fair	Good	Very Good
41 – 80	Poor	Fair	Good	Good	Very Good
81+	Poor	Good	Good	Very Good	Very Good

*(0, 20] means sampling fraction is greater than 0% but less than or equal to 20%; others are similar.

Otherwise, the following table is used to determine the reliability level of proportions:

Coefficient of Variation (CV) %

Vacancy Rate	0	(0,5]	(5,10]	(10,16.5]	(16.5,33.3]	(33.3,50]	50+
(0,0.75]	Excellent	Excellent	Excellent	Excellent	Excellent	V. Good	V. Good
(0.75,1.5]	Excellent	Excellent	Excellent	Excellent	Excellent	Fair	Poor
(1.5,3]	Excellent	Excellent	Excellent	V. Good	Good	Poor	Poor
(3,6]	Excellent	Excellent	V. Good	Good	Fair	Poor	Poor
(6,10]	Excellent	Excellent	V. Good	Good	Poor	Poor	Poor
(10,15]	Excellent	Excellent	Good	Fair	Poor	Poor	Poor
(15,30]	Excellent	Excellent	Fair	Poor	Poor	Poor	Poor
(30,100]	Excellent	Excellent	Poor	Poor	Poor	Poor	Poor

Reliability Codes for Averages and Totals

CMHC uses the CV to determine the reliability level of the estimates of average rents and a CV cut-off of 10% for publication of totals and averages. It is felt that this level of reliability best balances the need for high quality data and not publishing unreliable data. CMHC assigns a level of reliability as follows (CV's are given in percentages):

- a — If the CV is greater than 0 and less than or equal to 2.5 then the level of reliability is **Excellent**.
- b — If the CV is greater than 2.5 and less than or equal to 5 then the level of reliability is **Very Good**.
- c — If the CV is greater than 5 and less than or equal to 7.5 then the level of reliability is **Good**.
- d — If the CV is greater than 7.5 and less than or equal to 10 then the level of reliability is **Fair**.
- ** — If the CV is greater than 10 then the level of reliability is **Poor**. (Do Not Publish)

Arrows indicate Statistically Significant Changes

Use caution when comparing statistics from one year to the next. Even if there is a year over year change, it is not necessarily a statistically significant change. When applicable, tables in this report include indicators to help interpret changes:

- ↑ indicates the year-over-year change is a statistically significant increase.
- ↓ indicates the year-over-year change is a statistically significant decrease.
- indicates that the effective sample does not allow one to interpret any year-over-year change as being statistically significant.
- △ indicates that the change is statistically significant

DEFINITIONS

Availability: A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant (see definition of vacancy below).

Rent: The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the amount the owner is asking for the unit.

It should be noted that the average rents reported in this publication provide a sound indication of the amounts paid by unit size and geographical sector. Utilities such as heating, electricity and hot water may or may not be included in the rent.

Rental Apartment Structure: Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

Rental Row (Townhouse) Structure: Any building containing three or more rental units, all of which are ground oriented with vertical divisions. Owner-occupied units are not included in the rental building unit count. These row units in some centres are commonly referred to as townhouses.

Vacancy: A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Turnover: A unit is counted as being turned over if it was occupied by a new tenant moved in during the past 12 months. A unit can be counted as being turned over more than once in a 12 month period.

Definitions of Census Areas referred to in this publication are as follows:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 50,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

October 2016 data is based on Statistics Canada's 2011 Census area definitions. October 2017 data is based on Statistics Canada's 2016 Census area definitions.

Acknowledgement

The Rental Market Survey and the Condominium Apartment Survey could not have been conducted without the cooperation of the rental property owners, managers, building superintendents and household members throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution

CMHC HELPS CANADIANS MEET THEIR HOUSING NEEDS.

Canada Mortgage and Housing Corporation (CMHC) has been helping Canadians meet their housing needs for more than 70 years. As Canada's authority on housing, we contribute to the stability of the housing market and financial system, provide support for Canadians in housing need, and offer unbiased housing research and advice to Canadian governments, consumers and the housing industry. Prudent risk management, strong corporate governance and transparency are cornerstones of our operations.

Housing Observer Online

Featuring quick reads and videos on...

- Analysis and data
- Timely insights
- Updates to housing conditions and trends & *much more!*

All links can be shared in social media friendly formats!

The screenshot displays the Housing Observer Online website. At the top, there's a navigation bar with the title 'HOUSING MARKET INFORMATION PORTAL'. Below it, several article cards are visible, each with a date and a brief description. For example, one card dated 'JUNE 23, 2015' says 'The HMI Portal provides reliable and impartial housing market reports, data and analysis.' Another card dated 'AUGUST 04, 2015' discusses 'An alternative water ready home — what's the plan?'. A third card dated 'AUGUST 20, 2015' asks 'We have to learn to be flexible... and so does our housing'. A fourth card dated 'JULY 24, 2015' asks 'What is a condo?' and lists options: a) An apartment, b) A single family home, c) A townhome, d) All of the above. At the bottom of the screenshot, there's a red banner with the text 'Subscribe today to stay in the know!' and the URL 'www.cmhc.ca/observer'. Below the banner, there are more article cards, including one titled 'Own Their Home' and another titled 'Housing Starts: Preliminary and Assessment (HPA) April Update'.
